Subscription \* Free Trial

Resource group \* Aathmiga [Create new](#)

**Instance details**

Storage account name \* aathmiga

Region \* (Asia Pacific) East Asia [Deploy to an Azure Extended Zone](#)

Primary service Azure Blob Storage or Azure Data Lake Storage Gen 2

Performance \* ☒ Standard: Recommended for most scenarios (general-purpose v2 account)  
☐ Premium: Recommended for scenarios that require low latency.

Redundancy \* Geo-redundant storage (GRS)  
☒ Make read access to data available in the event of regional unavailability.

### Create a storage account

Blob and Data Lake Gen2 endpoints are provisioned by default [Learn more](#)

Enable SFTP ☐  
SFTP can only be enabled for hierarchical namespace accounts

Enable network file system v3 ☐  
To enable NFS v3 'hierarchical namespace' must be enabled. [Learn more about NFS v3](#)

**Blob storage**

Allow cross-tenant replication ☐

Access tier ☒ Hot: Optimized for frequently accessed data and everyday usage scenarios  
☐ Cool: Optimized for infrequently accessed data and backup scenarios  
☐ Cold: Optimized for rarely accessed data and backup scenarios

**Azure Files**

Enable large file shares ☒

Create a storage account ...

Private endpoint

Create a private endpoint to allow a private connection to this resource. Additional private endpoint connections can be created within the storage account or private link center.

+ Add private endpoint

| Name                                      | Subscription | Resource g... | Region | Target sub-... | Subnet | Private DN... |
|---|--------------|---------------|--------|----------------|--------|---------------|
| Click on add to create a private endpoint |              |               |        |                |        |               |

Network routing

Determine how to route your traffic as it travels from the source to its Azure endpoint. Microsoft network routing is recommended for most customers.

Routing preference \*

Soft delete enables you to recover file shares that were previously marked for deletion. [Learn more](#)

Days to retain deleted file shares

Tracking

Manage versions and keep track of changes made to your blob data.

☐ Enable versioning for blobs  
Use versioning to automatically maintain previous versions of your blobs. [Learn more](#)

Consider your workloads, their impact on the number of versions created, and the resulting costs. Optimize costs by automatically managing the data lifecycle. [Learn more](#)

☐ Enable blob change feed  
Keep track of create, modification, and delete changes to blobs in your account. [Learn more](#)

Access control

☐ Enable version-level immutability support  
Allows you to set time-based retention policy on the account-level that will apply to all blob versions. Enable this feature to set a default policy at the account level. Without enabling this, you can still set a default policy at the container level or set policies for specific blob versions. Versioning is required for this property to be enabled. [Learn more](#)
